DETAILED ACTION

Specification

1. The abstract of the disclosure is objected to because it contains a second paragraph which states "(Fig. 1)". Correction is required. See MPEP § 608.01(b).

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 21-27, 32 and 33 are rejected under 35 U.S.C. 102(b) as being anticipated by US Pat. No. 6,223,413 (Crocker et al.).

Crocker teaches an apparatus (installation device) for connecting longitudinal segments of a jacket body (workpiece) that forms a large component that extends longitudinally, defining a hollow space with an open face and having at least one connect seam on the workpiece for closing a circumferential side (see col. 3, lines 5-30, col. 8, lines 31-45, for example); an apparatus 10 with first head means 83 and second head means 85 (at least one tool pair having an inner tool and outer tool) which both include the use of fastener tools including riveting (see figure 7, col. 3, lines 1-5, col. 5, lines 28-36, for example); gantry assembly 70 (carrier pair) with first beam 72 (outer guide carrier) which carries the tool 83 and second beam 74 (inner guide assembly) which carries the tool 85 (see figures 15 and 17 col. 3, line 53 – col. 4, line 58, col. 5, lines 28-64, for example).

Allowable Subject Matter

4. Claims 28-31 and 34-40 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Art Unit: 3722
